PROFESSIONAL SUMMARY

Dynamic Software Engineer and 4× Hackathon Winner with proven expertise in full-stack development and enterprise programming. Skilled in Python, Java, and SAP Integration Development and SAP Database Administrator - SAP Hana, with a strong foundation in networking (Cisco CCNA). Currently enhancing project management skills at WesBank FML, supporting digital transformation initiatives and stakeholder coordination.

PROFESSIONAL EXPERIENCE

WesBank FML | 1 Enterprise Road, Fairland, 21

Apr '26 - Present

Business Analyst Intern

Business Analyst with experience translating business requirements into technical solutions, facilitating stakeholder engagement, conducting feasibility analysis, and supporting Agile project delivery through documentation, governance, and UAT coordination.

- Translated business requirements into functional and technical specifications aligned with business objectives
- Led requirements gathering, JAD sessions, feasibility analysis, and stakeholder engagement across project lifecycles
- Produced and managed BRS documentation, process flows, UAT test cases, and implementation support activities
- Utilised [Jira](#) and [Confluence](#) to support governance, Agile workflows, traceability, and cross-functional collaboration

Umuzi.Org | Remote

Dec '25 - Apr '26

Project Manager Intern

Project Management Intern with hands-on experience coordinating end-to-end projects, developing project planning artefacts, facilitating Agile ceremonies, and driving stakeholder collaboration to support successful project delivery.

- Coordinated Agile project delivery across scope, timelines, stakeholders, and project documentation
- Developed project artefacts including RACI matrices, Gantt charts, WBS, DFDs, stakeholder maps, and organograms
- Facilitated daily stand-ups, sprint planning, and design sprints to improve collaboration and delivery efficiency
- Applied design-thinking methodologies including ideation, prototyping, and process improvement initiatives

WeThinkCode | 132 Jan Smut Rosebank

Sep '25 - Dec '25

Placement Supervisor - Work Readiness Department

As Campus Role Supervisor I am responsible for overseeing students who have been allocated campus roles. I ensure that students complete their assigned hours, meet performance expectations, and adhere to role allocations. As Supervisor I act as the link between the students and the Project Manager, providing oversight, accountability, and reporting.

- Championed community engagement initiatives by guiding students in their campus roles, resulting in a **20% increase in compliance with assigned responsibilities**

- Amplified team effectiveness by implementing training sessions that promoted core skills in communication, time management, and product knowledge, resulting in a **15% improvement in performance** and increased customer satisfaction
- Enhanced student retention rates and satisfaction levels by utilizing **project management tools** for ongoing performance assessments and supportive guidance

EDUCATION

Eduvos | 44 Alsatian Rd, Glen Austin Ex

Present

BSc Information Technology: Software Engineering

Training in full-stack development, databases, and enterprise software principles.

Completing

WeThinkCode NPC | 132 Jan Smuts Rosebank Johan

Dec '25

Diploma in Software Engineering (NQF L6)

Training in full-stack development, databases, and enterprise software principles.

Central Johannesburg TVET College | 46 Pretoria St, Troyeville, Sand

Jan '23 - Dec '25

NC(V) Information Technology and Computer Science L2 - L4

Completed the National Certificate (Vocational) in Information Technology and Computer Science (Levels 2–4), building foundational skills in computer systems, software principles, and IT support.

Certifications

Cisco CCNA ITN, IT Essentials (A+) fundamentals, SAP Integration Development , SAP Database Administrator - SAP Hana, Python Essentials 1 & 2, Python for Data Science IBM

PROFESSIONAL DEVELOPMENT/AFFILIATIONS

Project Manager Intern – WesBank FML | Huawei ICT Academy Ambassador | SAP Certified Associate | Cisco CCNA ITN | IT Essentials (A+) | 4× Hackathon Winner

Projects

Cloud Native Python Flask Micro service solution

- I built and deployed a **cloud-native Flask microservices application** consisting of an API Gateway and an Inventory Service using a production-style architecture. The project involved designing **RESTful APIs** with **Marshmallow** for data serialization and validation, containerizing the services with **Docker**, and pushing images to **Amazon ECR**. I deployed and orchestrated the containers using **AWS ECS**, configuring task definitions, services, and **Application Load Balancer (ALB)** for traffic management. I also set up supporting **AWS infrastructure**, including **EC2 instances**, **networking**, and **service-to-service communication**, and implemented an **end-to-end DevOps workflow** from local development to scalable, cloud-ready deployment.

Robots World – (JAVA)

Description :

- Built a client–server game demonstrating Java OOP principles, socket programming, and networking. Designed modular robot commands using inheritance, implemented TCP-based JSON communication, and developed a multithreaded server managing multiple clients concurrently.

Smart-Loan Approval Predictor – (Python ML)

Description :

- Developed a machine learning web application that predicts loan approval using a Random Forest Classifier. Built with Python and Streamlit, the app provides an interactive interface for users to input their details and receive predictions with confidence scores. Integrated explainable AI to highlight factors influencing decisions, implemented input validation and error handling, and logged all predictions for auditing. Added visualizations to make results clear and actionable, demonstrating skills in ML modeling, web deployment, data handling and user-centric design.

PCP NQF Level 3 Computer Science ISAT Project – Stock

Control VB.Net Application

- Developed a comprehensive stock control system using VB.Net, integrating databases to efficiently manage electronic product inventories. The application implements sorting and searching algorithms to organize and locate stock items effectively, demonstrating practical application of algorithms, database management, and problem-solving skills. Features include real-time inventory tracking, algorithm-driven data operations, and a robust user interface, highlighting competence in VB.Net development, database integration, and algorithm implementation.

KEY SKILLS

- **Programming & Development:** Python, Java, JavaScript, VB.NET, .NET, HTML, CSS, SQL
- **Enterprise & Integration:** SAP Integration Development, Enterprise Application Integration
- **Networking & Systems:** Cisco CCNA ITN, IT Essentials (A+) fundamentals
